

# DIY: How To Have Your Dream

Under \$300

## Step 1 - Begin with Basics

You can start with two shelves (24" x 14") on top with one 48" Hanging Rod. Add the required Top Rail and 3 Uprights, and you will achieve a basic system of a beautiful dream closet with space for hanging your long items.

This Rigel Base System will give you the flexibility to add components to your liking.

## Step 2 - Design Flexibility

Add some organization tools such as shelving. Since you already have the Basic Closet System, you can continuously add more components according to your needs. For example, you can add a Shelf with a Hanging Rod to divide the long hanging space into a section for double hanging items.

This will give you 100% more space for your clothes than the existing area, thus you will have double the space for organizing.

Under \$400

# Closet In Your Budget

## Step 3 - Upgradable

Besides doubling the space, you can add your favourite accessories and components to maximize functionality and complete your Dream Closet.

Our versatile system allows the flexibility to add additional components in the future, to adjust with your changing lifestyle.

## Feedback from Customers

*"We can maximize our small closet space and it can be changed over time. Love the system!"*

*"There are other closet systems out there, but none like Rigel. Best product and service."*

Some additional accessories.
